

Most Predictable Fat Graft On The Market

Long-term graft retention depends on the purity of the fat transferred.
Puregraft™ delivers up to 97% pure fat for injection.

**“Fat grafting with
Puregraft allowed for
that soft, natural look I
wanted. It’s life
changing.”**

Up to 4 TIMES

Fat Transfer In Breast Reconstruction
VALUED BY PATIENTS
MORE VALUE FOR YOU

STERILE

CLOSED-SYSTEM BAG design provides safer, sterile processing to minimize the risk of infection.

SUPERIOR

MOST PREDICTABLE fat graft on the market, clinically validated to improve long-term graft retention.

SIMPLE

TIME SAVING and easy to use, allowing you to focus on your patient, with just three simple steps.

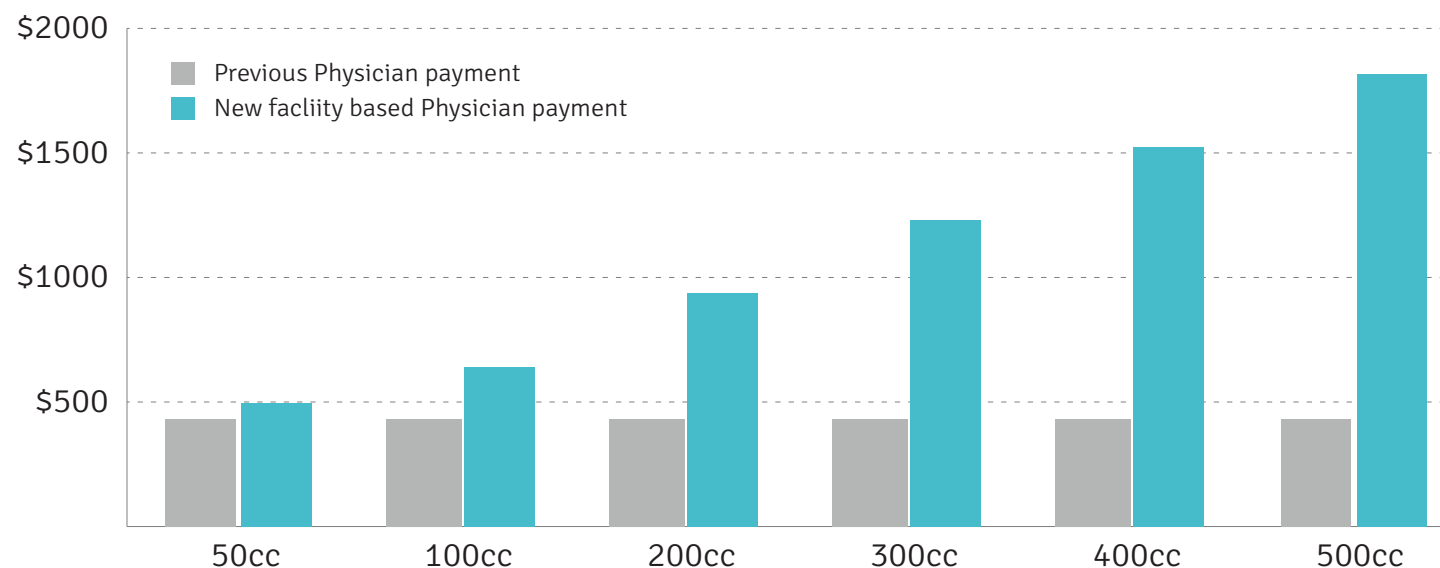

The Puregraft™ Advantage

Simple Process, Superior Results

Physician payments for fat transfer have increased and reflect the time and resources taken to support fat grafting in breast reconstruction.

Reimbursement has transitioned from a flat rate to a volume-based reimbursement scale.

Physician payment for facility based fat transfer

Grafting of autologous fat harvested by liposuction technique to trunk, breasts, scalp, arms, and/or legs

Procedures administered in office reimburse 20 - 26% higher than facility based procedures

Integrates **Seamlessly** Into Your Practice

Puregraft™ provides a simple, proven, and powerful process to harvest, purify and deliver the fat graft.

Process up to 50 - 850cc of fat for transfer in 10-15 minutes.
